The Hogg & Davis, Inc. Break-Away reel was designed to recover overhead or underground cable, conductor or strand which is to be scrapped.

No demurrage costs because company reels are no longer being used to ship scrap cable.

Eliminates the mass and cost of shipping because the cable is made into easily handled coils.

No collapsed reels because the Break- Away reel is designed to withstand 50,000 lbs. line pull.

No scrap penalties because the "scrapers" do not have to handle messy chopped cable or additional reels.

Reduced freight cost because nothing is shipped but scrap.

Product improvements may be introduced at any time, specifications are subject to change without notice.
