RUGGED DEPENDABILITY

Rigged and ready to roll, the PM10 Pole Muzzle is secured to the pole and facilitates rigging back to the trailer for a solid and safe towing package.

The snubbing and cinch chains provide solid capture of the pole. The cinch chain is designed to be used in conjunction with a binding chain back to the trailer. For additional security, the stron backed PM10 is slotted for a bolt to go through the gain hole on the pole.

Specifications	
Model	PM10
Length	33 inches
Weight	Approx. 60 lbs
