

ODP60 XS 6,000 Lb Drum Puller

Pulling Control

The following instructions explain how to properly set up the unit when it is to be used as a puller and have a pulling rope UNDER TENSION. Use of these instructions assumes that all controls are at the same setting when the pulled previously stopped.

1. Set holding brake to the Disabled position.
2. Begin to slightly actuate the joystick to take up.
3. Set holding brake switch to the Automatic position.
4. Actuate the joystick to take up as desired. (if reel does not begin to move, slightly increase the Hydraulic Pressure Control until it does.)

Level wind

This unit is equipped with manual post style level wind. Operator must control during pull as needed for even take up of rope on reel.

IF MACHINE IS TO BE USED FOR FIBRE OPTIC INSTALLATION, REFER TO THE CABLE MANUFACTURER FOR PROPER TENSIONING TECHNIQUES. FAILURE TO CONSULT MANUFACTURER MAY DAMAGE CABLE AND VOID WARRANTY.
